

Question 21. When implementing linear regression of some dependent variable  $y$  on the set of independent variables  $\mathbf{x} = (x_1, \dots, x_r)$ , where  $r$  is the number of predictors, which of the following statements will be true?

- a)  $\beta_0, \beta_1, \dots, \beta_r$  are the regression coefficients.
- b) Linear regression is about determining the best predicted weights by using the method of ordinary least squares.
- c)  $E$  is the random interval
- d) Both a and b

ANSWER 21. D) Both a and b

QUES 22 ) What indicates that you have a perfect fit in linear regression?

- a) The value  $R^2 < 1$ , which corresponds to  $SSR = 0$
- b) The value  $R^2 = 0$ , which corresponds to  $SSR = 1$
- c) The value  $R^2 > 0$ , which corresponds to  $SSR = 1$
- d) The value  $R^2 = 1$ , which corresponds to  $SSR = 0$

ANSWER 22- OPTION d) The value  $R^2 = 1$ , which corresponds to  $SSR = 0$

QUESTION 23) In simple linear regression, the value of what shows the point where the estimated regression line crosses the  $y$  axis?

- a)  $Y$
- b)  $B_0$
- c)  $B_1$
- d)  $F$

ANSWER- OPTION b)  $B_0$

24) Check out these four linear regression plots: Which one represents an underfitted model?

- a) The bottom-left plot
- b) The top-right plot
- c) The bottom-right plot
- d) The top-left plot

ANSWER- OPTION d) The top-left plot

Q 25) There are five basic steps when you're implementing linear regression:

- a. Check the results of model fitting to know whether the model is satisfactory.
- b. Provide data to work with, and eventually do appropriate transformations.
- c. Apply the model for predictions.
- d. Import the packages and classes that you need.
- e. Create a regression model and fit it with existing data. However, those steps are currently listed in the wrong order. What's the correct order?

- a) e, c, a, b, d
- b) e, d, b, a, c
- c) d, e, c, b, a
- d) d, b, e, a, c

ANSWER- OPTION d) d ,b, e, a, c
